INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

(Chapter I of the Patent Cooperation Treaty)

(PCT Rule 44bis)

Applicant's or agent's file reference 15347.01WO1	FOR FURTHER ACTION		See item 4 below
International application No. PCT/US2004/039247	International filing date (<i>day/month/year</i>) 19 November 2004 (19.11.2004)	Priority date (<i>day/month/year</i>) 19 November 2003 (19.11.2003)	
International Patent Classification (8th edition unless older edition indicated) See relevant information in Form PCT/ISA/237			
Applicant GALAS, Adam			

1.	This international preliminary report on patentability (Chapter I) is issued by the International Bureau on behalf of the International Searching Authority under Rule 44 bis.1(a).		
2.	This REPORT consists of a total of 4 sheets, including this cover sheet.		
	In the attached sheets, any reference to the written opinion of the International Searching Authority should be read as a reference to the international preliminary report on patentability (Chapter I) instead.		
3.	This report contains indications relating to the following items:		
	<input checked="" type="checkbox"/>	Box No. I	Basis of the report
	<input type="checkbox"/>	Box No. II	Priority
	<input type="checkbox"/>	Box No. III	Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
	<input type="checkbox"/>	Box No. IV	Lack of unity of invention
	<input checked="" type="checkbox"/>	Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
	<input type="checkbox"/>	Box No. VI	Certain documents cited
	<input type="checkbox"/>	Box No. VII	Certain defects in the international application
	<input type="checkbox"/>	Box No. VIII	Certain observations on the international application
4.	The International Bureau will communicate this report to designated Offices in accordance with Rules 44bis.3(c) and 93bis.1 but not, except where the applicant makes an express request under Article 23(2), before the expiration of 30 months from the priority date (Rule 44bis .2).		

The International Bureau of WIPO 34, chemin des Colombettes 1211 Geneva 20, Switzerland Facsimile No. +41 22 740 14 35	Date of issuance of this report 22 May 2006 (22.05.2006) Authorized officer Yoshiko Kuwahara Telephone No. +41 22 338 90 90

Applicant

ADAM GALAS

1. This opinion contains indications relating to the following items:

- ☒ Box No. I Basis of the opinion
- ☐ Box No. II Priority
- ☐ Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
- ☐ Box No. IV Lack of unity of invention
- ☒ Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
- ☐ Box No. VI Certain documents cited
- ☐ Box No. VII Certain defects in the international application
- ☐ Box No. VIII Certain observations on the international application

2. FURTHER ACTION

If a demand for international preliminary examination is made, this opinion will be considered to be a written opinion of the International Preliminary Examining Authority ("IPEA") except that this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notified the International Bureau under Rule 66.1bis(b) that written opinions of this International Searching Authority will not be so considered.

If this opinion is, as provided above, considered to be a written opinion of the IPEA, the applicant is invited to submit to the IPEA a written reply together, where appropriate, with amendments, before the expiration of 3 months from the date of mailing of Form PCT/ISA/220 or before the expiration of 22 months from the priority date, whichever expires later.

For further options, see Form PCT/ISA/220.

3. For further details, see notes to Form PCT/ISA/220.

Name and mailing address of the ISA/ US Mail Stop PCT, Attn: ISA/US Commissioner for Patents P.O. Box 1450 Alexandria, Virginia 22313-1450 Facsimile No. (703) 305-3230	Date of completion of this opinion 04 October 2005 (04.10.2005)	Authorized officer Carl Friedman  Telephone No. (571) 272-3600

**WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY**

International application No.

PCT/US04/39247

Box No. I Basis of this opinion

1. With regard to the language, this opinion has been established on the basis of:

- ☒ the international application in the language in which it was filed
- ☐ a translation of the international application into _____, which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)).

2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:

a. type of material

- ☐ a sequence listing
- ☐ table(s) related to the sequence listing

b. format of material

- ☐ on paper
- ☐ in electronic form

c. time of filing/furnishing

- ☐ contained in the international application as filed.
- ☐ filed together with the international application in electronic form.
- ☐ furnished subsequently to this Authority for the purposes of search.

3. ☐ In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

4. Additional comments:

**WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY**

International application No.
PCT/US04/39247

Box No. V Reasoned statement under Rule 43 bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims <u>NONE</u>	YES
	Claims <u>1-12</u>	NO
Inventive step (IS)	Claims <u>NONE</u>	YES
	Claims <u>1-12</u>	NO
Industrial applicability (IA)	Claims <u>1-12</u>	YES
	Claims <u>NONE</u>	NO

2. Citations and explanations:

Claim 1-12 novelty under PCT Article 33(2) as being anticipated by U.S. Patent 1,488,090 as being anticipated by Buhr. Buhr shows in Figures 1-14 and describes in the specification a skirting board (conduit baseboard) comprising of a base profile (5) and guard profile (17). The guard profile (17) has a protruding portion (23) that interfaces with the receiving portion (7,13) of the base profile (5) and a curved portion (18). The guard profile (17) is shown in figure 3 to have a one open space with a deflecting arm (19) and curved portion (18) to provide a finish corner produced by a floor (4) and a wall (1). The skirting board that has a space to receive a cable and has a portion with a surface (7 or 13) to receive the guard profile (17). The protruding portion (7 or 13) has an interface portion adapted to interface with one oblique surface (19 or 23). The base profile (5) has a plurality of openings for attachment to the base profile (5).

The skirting board has a open base profile (5) and is fastened in it by means of two web guard profiles (13 and 17) where the guard profile (17) has a long and short arm (19 and 23) bended to be connected where the open base profile is a trapezoidal in shaped (cross-section view), wherein the guard profile (17) has narrowing at the outer edges (19 and 23) being limited with two oblique surfaces (7 and 12), and an outwardly deflected arm (19) of the guard profile (17) able to be connected to the shaped edges of each profiles (base (5) and guard (17)). An arm (8) of the base profile (5) is swept out at its outer end. The base profile (5) is shown to have a series of ports or openings.

The skirting system (conduit baseboard) is shown in Figures 1, 5 and 6 to have longitudinal shirting and joint elements of two jointing separate elements (13 and 17) with ability to form an inner corner and outer corner connection. The two web bars (13 and 17) are fixed at different levels able to receive the guard profile (17) with upward and downward motion with the arched tailpiece (18 and 19) that is outwardly deflected.
